1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 26-41 are, drawn to IC design having "floorplanning", classified in class 716, subclass 6.
- II. Claims 42-57, drawn to multiplexer in use in multiplier, classified in class 708, subclass 620+.

2. The inventions are distinct, each from the other because:

Each group of claims is directed to a separate invention. It is noted that the groups maybe belong to a system. However, this is not sufficient to prevent a restriction requirement.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
